

## Categories of Fellowship

The six Objects of Fellowship and their sub-categories are described below. Click on the link to Recipients to see a list of recent Fellows in each sub-category with their summary statements. Those submissions which were deemed by the jury to be best examples in their object are noted in the list, and the most recent best examples are available online.

Electronic copies of submissions are available from [archives@aia.org](mailto:archives@aia.org). Please include years as well as names in your request.

Prior to 2014, the requirements for exhibits were different. Earlier submissions are available in the Archives, but are not recommended as models to follow.

1. *"To promote the aesthetic, scientific, and practical efficiency of the profession"*

Fellowship in this object is granted to architects who have produced distinguished bodies of work through design, urban design, or preservation. This may be accomplished through individual or organization effort. Works submitted may be of any size, for any client, of any scope, and reflecting any type of architectural design service.

[Recipients in design](#)

[Recipients in urban design](#)

[Recipients in preservation](#)

2. *"To advance the science and art of planning and building by advancing the standards of practice"*

Fellowship in this object is granted to architects who have made notable contributions through their work in the practice of architecture. Practice includes firm management, administration, and project management, or specialty areas (specific building types, technical expertise).

[Recipients in Practice Management](#)

[Recipients in Technical Advancement](#)

[Recipients in practice \(before 2015\)](#)

Note: Practice was divided into Practice Management and Technical Advancement starting in 2015. Education, research, and literature, formerly in object 2, have been moved to object 6.

3. *"To coordinate the building industry and the profession of architecture"*

Fellowship in this object is granted to architects who have actively, efficiently, and cooperatively led the Institute, or a related professional organization over a sustained period of time and have gained widespread recognition for the results of their work.

[Recipients who led the Institute](#)

[Recipients who led related organizations](#)

4. *"To ensure the advancement of the living standards of people through their improved environment"*

Fellowship in this object is granted to architects who have made notable contributions in public service or work in government or industry organizations through leadership in the development of civic improvements and needed governmental projects, including such elements as conservation, beautification, land-use regulation, transportation, or the removal of blighted areas, or who have clearly raised the standards of professional performance in these areas by advancing the administration of professional affairs in their fields.

[Recipients in public service](#)

[Recipients in government/industry organizations](#)

5. *"To make the profession of ever-increasing service to society"*

Fellowship in this object is granted to architects who have made notable contributions to the public good through alternative careers or volunteer work with charitable organizations not directly connected to the built environment. Achievements may also be of a kind that transcends the other categories for advancement to serve society or humanity in a unique and important manner.

[Recipients in alternative careers](#)

[Recipients for volunteer work](#)

[Recipients for service to society](#)

6. *"To advance the science and art of planning and building by advancing the standards of architectural education and training"*

Fellowship in this object is granted to architects who have made notable contributions through their work in education, research, or literature. Work in education may be teaching, research, administration, or writing and should have a lasting impact, be widely recognized, and provide inspiration to others in the field and the profession. Research areas may include building codes and standards, specifications, new material applications, or inventions.

[Recipients in education](#)

[Recipients in research](#)

[Recipients in literature](#)

Note: Object 6 was new in 2022. Until 2021, education, research, and literature were part of Object 2. Past years' recipients for education, research, and literature are listed with Object 6 in this document for convenience.
